

TM30

The chart displays the Color Sample Fidelity Index for 50 samples. The y-axis represents the fidelity score, ranging from 0 to 120. The x-axis lists the samples from S1801 to S1900. The bars are color-coded in a gradient: red/pink for the first 10 samples, orange for the next 10, yellow for the next 10, green for the next 10, and purple for the last 10. The fidelity scores are generally high, mostly between 90 and 100, with a few variations.
