

TM30

The chart displays the Color Sample Fidelity Index for 60 samples. The y-axis represents the fidelity score, ranging from 0 to 120. The x-axis lists the samples from S3801 to S3960. The bars are color-coded in a gradient from red to purple. Most samples have fidelity scores between 90 and 100, with a few outliers like sample 35 at 100 and sample 45 at approximately 89.
